## Summary

Full Stack Developer specializing in MERN stack with hands-on experience building scalable, performance-optimized web applications. Strong focus on system design, API optimization, and delivering production-ready solutions with modern UI/UX.

## Skills

Languages & Databases: JavaScript (ES6+), C++, SQL (MySQL), MongoDB (NoSQL).  
Frontend Development: React.js, HTML5, CSS3, Tailwind CSS, Responsive Design, State Management.  
Backend & Database: Node.js, Express.js, Firebase, RESTful APIs, Non-relational Database Design.  
Tools & DevOps : Docker , Git, Postman.  
Concepts : REST APIs, JWT Authentication, System Design Basics, Performance Optimization .  
Methodologies: SDLC (Software Development Life Cycle), Agile/System Design, Workflow Automation (n8n).

## Internship

### Frontend Developer Intern

June 2025 – August 2025

ADRS Technosoft

Tools Used: HTML, CSS, JavaScript, React, REST APIs

- Production-Grade UI Development: Engineered responsive user interfaces from Figma specifications for Spark, an e-learning platform successfully deployed to 100+ active learners.
- Performance Optimization: Integrated and optimized RESTful APIs and State Management to drive real-time data flow, resulting in significantly improved application load times and user engagement.

## Projects

### Market Academy

April 2026

- Engineered a **custom high-performance SVG charting engine** with viewport-based rendering, smooth panning, and dynamic scaling, enabling efficient handling of large financial datasets with zero UI blocking.
- Architected a **scalable full-stack system** with automated data pipelines (cron-based ingestion from financial APIs), optimized query handling (debounced search + cursor pagination), reducing redundant API calls by 60%.
- Delivered a **production-ready PWA** with advanced caching (Workbox), secure JWT-based authentication, and DOM sanitization, delivering offline capability, fast load times, and a responsive, high-fidelity UI.

### Anjuman-Masjid Management System

May 2025

- Automated Financial Workflows: Engineered a full-stack solution reducing manual bookkeeping by 90% via automated workflows and RESTful API integrations.
- Real-time Data Accuracy: Implemented a Node.js backend with Unit Testing to ensure high data accuracy and consistency in financial tracking and real-time data management.
- Enhanced Operational Transparency: Optimized Database Queries to provide committee members with instant insights, leading to faster data-driven decision-making.

## Hackathons & Certifications

### Hack SRIT 2025 — Anonymous Chat App | Socket.io, AI Moderation

March 2025

- Built a real-time anonymous chat app using Socket.io with JWT authentication and AI-based moderation to block abusive content and ensure low-latency, secure messaging.

### Frontend Developer Certification — Coding Thinker | HTML, CSS, JavaScript

- Completed a structured frontend development program covering core concepts of HTML5, CSS3, and JavaScript (ES6+), with a focus on responsive design and modern UI practices.

## Education

### Bachelor of Technology in Computer Science Engineering

Expected Graduation: June 2026

Shri Ram Group of Institutions

CGPA: 8.17 / 10
